

To Whom It May Concern, Please, reject the National Association of Broadcasters' petition 04-160. Do not protect the NAB by restricting XM Radio's entrepreneurial approach to providing local information to their nationwide market. Make the NAB compete without the interference of government. I have made the decision to purchase the programming provided by XM Radio and want the varied selections and services that they provide that cannot be found anywhere else. I specifically made the decision to purchase XM's services because of their many unique programming venues.
